

SHOEBOX Online Test

An Online Hearing Screening Test for New Customer Acquisition

Unique in its capacity to categorize hearing ability

Hearing is an essential part of life, it connects us through communication & expression. Hearing loss can break that connection, create barriers and disconnect us from those around us.

Enable Hearing Assessments

Research shows that it takes an average of seven years from the time of a realized hearing loss to progress to the next step in the hearing health journey. SHOEBBOX Online enables participants to assess their hearing from any device - mobile phone, tablet, or laptop - and with the headphones they already own. The test will effectively categorize participants based on their hearing ability - normal hearing, some hearing loss, or significant hearing loss - and offer education and motivation to help them start their hearing health journey sooner. Adding the SHOEBBOX Online hearing screening test to your workflow can help you reach, and begin to engage, a broader range of customers who are ready to take the next step in that journey.

- ✓ Great customer experience
- ✓ Classify into three hearing levels
- ✓ Mobile and desktop optimized

SHOEBOX Online Test

Easy to Use

- ✓ Great customer experience
- ✓ Easy to execute, straightforward results interpretation
- ✓ Education and motivation to take the next step

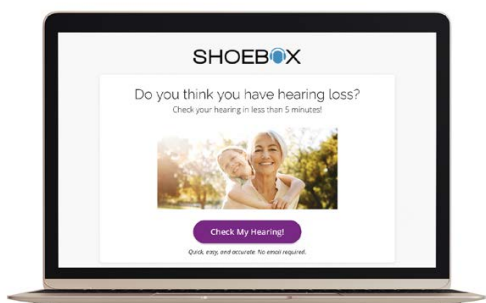

Effectively Categorize

- ✓ Participants categorized based on hearing levels
- ✓ Data-driven online hearing screening test based on thousands of data points analyzed and mapped against 5 factors to ensure effective categorization

Mobile Ready

- ✓ Optimized for both mobile and desktop
