# SHOEBOX Audiological Services

*Making the shift from a service provider to bringing your occupational hearing testing program in-house is a big decision. Doing so will offer you greater flexibility and control. And it will be less expensive in the long run. But it can also mean taking on additional responsibilities for you, and your team. That's why finding the right partner is paramount. One who provides leading-edge testing equipment, data management, and comprehensive Audiological Services.*

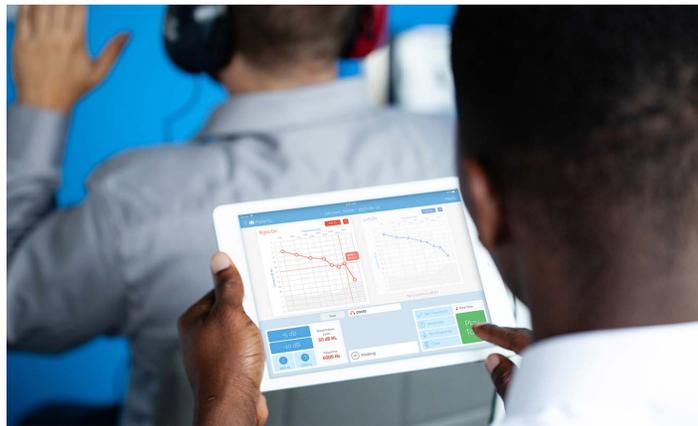

At SHOEBOX, we've revolutionized the way hearing testing is conducted. We've helped hundreds of customers take back control of their programs. Yes, our testing system can be a game-changer for you. But it is our Audiological Services that complete the solution. And they will help make your transition to in-house seamless.

Choose from any of the following optional services:

## Audiological Consulting Services

If you are just getting started with your in-house testing program, or are new to using SHOEBOX and would like support on how to incorporate it into your program, we can help. We can provide support with system configurations, how to enable your own reviewer in our web-based portal, and more. Just tell us what you need.

## Audiological Professional Supervision

If you need an Audiological Professional Supervisor, our CAOHC-certified PS team can perform this role for you. In this capacity we can offer:

- ✓ Support to ensure your testing environment meets OSHA requirements for open-room testing
- ✓ Review of your historical records and suggest record keeping best practices
- ✓ Testing configuration support
- ✓ Training of test administrators

## Audiogram Review

When you choose SHOEBOX, you will have access to one of the largest networks of licensed audiologists who specialize in occupational health reviews. With coverage across North America, our Reviewer Network can offer:

- ✓ Shift determination and confirmation
- ✓ Identification and review of problem audiograms
- ✓ Baseline audiogram revisions
- ✓ Ensuring completeness of results
- ✓ Test follow-up recommendations
